

## BASIC TIPS FOR ONLINE SECURITY

### ONLINE ACCOUNTS

Create **STRONG** and **UNIQUE** passwords for each of your online accounts.

Alternate the **USE** of numbers, upper and lower case letters, and symbols.

Be sure to **WRITE DOWN** your passwords in a secure place.

Set the **PRIVACY SETTINGS** in each individual account to where you feel comfortable.

### SENSITIVE INFO

**BE PROTECTIVE** about sensitive and personal information you handle on the web.

Avoid **SUSPICIOUS** links, websites, and online offers that might be **SCAMS**.

Before connecting to a **Wi-Fi hotspot**, be sure it is a legitimate one.

**Online shopping** is convenient. Make sure the website is **SECURE** before providing any information to the site.

### COMPUTER SECURITY

Always keep up to date your **SECURITY SOFTWARE**. Automated software updates make your life easier.

Make sure that **all your DEVICES** (personal computers, smartphones, tablets, etc...) that connect to the internet are **PROTECTED**.

When you **plug** a USB to your computer, make sure to **SCAN** it for viruses and malware.
